(2020-2022)

#### Responsibilities

- Output In a high paced environment.
- Cash handling & using a computerised till.
- Gate supervision
- Handling disputes between customers.

### Current situation & hobbies

I am actively looking for internships in different areas of software engineering.

I am pursuing multiple personal projects set out on my portfolio website which will demonstrate my coding abilities. Although there is a low degree of real-world application with my personal projects, I have considered what I would personally find useful.

I have various hobbies that I consistently and reliably work towards, these include indoor bouldering, PC gaming, playing the electric guitar and covering songs, and reading science fiction.
